

# Key Business Verticals

Facility Design - Smart, compliant, and efficient facility Designs.

Process Engineering - Optimized processes for peak performance

Automation - Intelligent systems for seamless operations.

Project execution - On-time, coordinated project delivery.

Feasibility Study - Portfolio ID, Trend Analysis, Case Study, Concept Design.

# About Us

GoForge Epix is a forward-thinking engineering and infrastructure company specializing in turnkey solutions for the pharmaceutical, chemical, and life-sciences sectors.

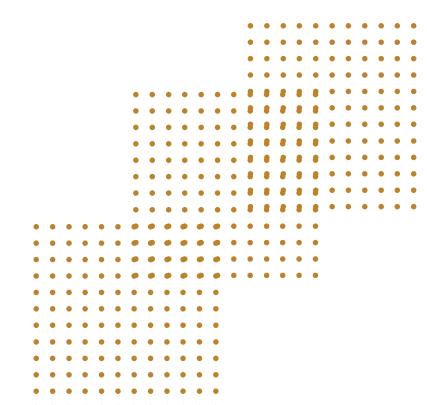

We deliver smart, compliant, and sustainable facilities through our expertise in modular labs, process engineering, and digital automation. Our goal is to empower clients with operational excellence, regulatory integrity, and future-ready innovation.

## OUR SERVICES

- Design & Innovation - Transforming ideas into intelligent facility concepts through digital design and engineering expertise.
- Engineering Excellence - Delivering optimized layouts, robust process systems, and energy-efficient solutions tailored to your needs.
- Execution & Delivery - Fast-tracked, quality-assured project delivery – from groundwork to handover, every detail perfected.
- Support & Optimization - Ongoing technical assistance, performance tuning, and lifecycle enhancements for sustained efficiency

**GOFORGE EPIX (GFX)**  
for limitless possibilities

## STRUCTURED AND DIGITALLY EXECUTION MODEL

- Optimized design and layout powered by BIM and Digital Twin technologies.
- Transparent procurement through vendor benchmarking and real-time cost tracking.
- On-site quality assurance and safety-first construction methodology.
- Seamless handover backed by comprehensive validation and client training

# Sustainability & Innovation

At GoForge Epix, sustainability is our core design philosophy.

We integrate eco-conscious engineering and digital innovation to create smarter, cleaner, and safer facilities.

- Eco-Friendly Operations – Energy-efficient and environmentally responsible project delivery.
- Digital Innovation – BIM, VR, and AR-driven planning for precision and reduced rework.
- Resource Efficiency – Optimized utilities and strict environmental compliance.
- Safe Workplaces – Embedded EHS risk assessments for zero-harm environments

# Competitive Advantages

- Rapid project mobilization and execution.
- End-to-end multidisciplinary expertise.
- Strong focus on regulatory compliance and documentation.
- Post-handover support and continuous facility optimization.
- Value engineering that balances cost, performance, and innovation

## Systematic Project Execution

**EHS** Risk Management

**ASME**  
SETTING THE STANDARD

## For Limitless Possibilities
